

Apamarga

Anti-inflammatory:

Anti-inflammatory refers to any substance, food, or drug that reduces inflammation—such as pain, swelling, and redness—in the body

Diuretic action:

Diuretics work by making the kidneys remove more sodium and water from the body into the urine, which lowers fluid volume in the blood vessels and reduces blood pressure

Mucolytic:

blocking the kidneys from reabsorbing sodium, which causes extra sodium and water to pass out of the body in your urine.

Benefits of Apamarga

Oral hygiene & First aid application

- Chewing on the fresh roots or twigs to clean teeth and treat swollen gums.
- Crushing fresh leaves into a paste and rubbing it onto a scorpion sting or a cut to stop bleeding.

Surgical intervention & Dietary supplement

- Using Apamarga Ksharsutra (medicated thread) in clinics to cure anal fistulas.
- Mixing the root powder with honey or water to relieve chronic coughs.

WHY ONLY APAMARGA?

Why Apamarga Stands Out:

- 🌱 Important traditional medicinal herb
- 🌿 Used in traditional Ayurvedic practices
- 🌿 Contains various natural plant compounds
- 🔬 Has interesting medicinal and scientific importance
- ★ Less commonly chosen for projects
- 🌍 Represents India's rich traditional knowledge of medicinal plants
