

Chirata

Reduces Fever:

Reducing fever means using a substance—like medicine or herbs—to lower an abnormally high body temperature back down to its normal range (around 37°C or 98.6°F).

Protects the Liver:

Protecting the liver means preventing liver damage and helping the organ filter toxins, repair its own cells, and function properly.

Lowers Blood Sugar:

Lowers blood sugar means helping your body move glucose (sugar) out of the bloodstream and into your cells where it can be used for energy

Benefits of Chirata

Digestive Tonic & Skin Treatments

- Drunk as a bitter tea or decoction to stimulate digestive enzymes, eliminate bloating, and boost a weak appetite.
- Applied topically as a paste or wash to treat stubborn acne, eczema, rashes, and slow-healing wounds.

Immunity Booster & Weight Management

- Taken regularly during seasonal changes to guard against common coughs, colds, and viral infections.
- Consumed to fire up a sluggish metabolism and improve nutrient absorption.

WHY ONLY CHIRATA ?

Why Chirata Stands Out:

- 🌱 Important traditional medicinal herb
- 🌿 Traditionally used in herbal preparations for digestive wellness
- 🌡️ Traditionally associated with support during fever and seasonal illnesses
- 🌿 Contains several natural plant compounds
- ⭐ Less commonly chosen, making it a unique project topic
- 🔬 Has both traditional and scientific importance
